-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are indefinite because it is not clear how the water level be determined by sensing laundry amount. This is especially not clear in view of claim 2, which recite that a first laundry amount is a dry amount. Is setting/calculating the desired water level based on the sensed amount of laundry is referenced?

The claims are indefinite because it is not clear how can a washing pattern be determined by sensing a laundry amount. By sensing the amount of laundry only the amount of laundry would be determined. Any other determinations would require additional manipulative steps.

The claims are indefinite because it is not clear how can the determined water level be reset. The determined value is not a value, which can be set or changed. The determined value is a constant, which was determined.

The claims are indefinite because it is not clear how can operational parameters be reset by sensing a laundry amount. Sensing the laundry amount can make only determination of laundry amount. Resetting of the referenced operation parameters could not be made by sensing another one.

Claims 4-5 are indefinite because it is not clear what is referenced as consequently sensed laundry amounts. These claims are also indefinite because it is not clear what is referenced as a current value of the re-sensed third laundry amount. The claims are further indefinite because it is not clear how can re-sensing of the same amount of laundry provide different results and serve as a basis for optimization of washing cycle.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being as been anticipated by Harwood et al (US Patent No 5,768,728).

Harwood et al teach a method as claimed. See entire document, especially columns 4- 9, wherein the details of the method are disclosed.
